AVMSFX

DRY-HIRE & CONSUMABLES

2024 V1

From humble beginnings as a specialized effects company, our vision has always been to transform ordinary events into extraordinary experiences. Today, we've evolved into a comprehensive dry hire rental and distribution hub, offering an extensive array of special effects to suit events of all scales – from intimate gatherings to grand stadium concerts.

Fuelled by our unwavering passion for the dynamic events industry, we pride ourselves on curating a vast inventory of cutting-edge special effects and accessories sourced from top-tier manufacturers worldwide. Our mission is simple: to be your trusted partner in crafting unforgettable moments.

Drawing on our wealth of experience and in-depth industry knowledge, we've developed a streamlined special effects dry hire system that saves both time and money, offering numerous benefits to our valued clients and collaborators globally.

This catalogue serves as your ultimate resource, presenting a diverse selection of equipment and accessories for creating sensational shows. Should you not find what you're seeking, simply reach out to us, and we'll go the extra mile to accommodate your needs.

Furthermore, we offer comprehensive support services, including project visualization, timecode programming, skilled technicians, seamless logistics, and timely deliveries – ensuring the smooth execution of your vision from start to finish.

At AVM-SFX, we're your definitive one-stop destination for all special effects hire requirements, along with accessories and consumables. Whether your copy of this catalogue has gone missing or suffered a coffee spill during late-night planning sessions, rest assured, we're always here to provide a replacement or access it online via our website: www.avm-sfx.com.

Enjoy!

Magic FX	SFX Safety combiner box	45,00 €
Magic FX	SFX Safety combiner 19” rack	75,00 €
Magic FX	SFX Safety beacon	10,00 €

EXAMPLES OF SET-UPS

1. DMX and arm cables are separated. Useful when high risk sfx machines are combined with lower risk sfx machines in the same line. Or when preferred to place the arm controller close to the sfx machines.

2. Two SFX Safety combiner boxes are used to merge DMX and arm signal to create two output lines, for example stage left and stage right.

3. A SFX Safety combiner 19’’ rack is used in combination with a DMX splitter to split the lines and create a star network.

5 STEPS TO MAKE A SHOW

1. Request a quote
Our catalog gives you a comprehensive list of all our equipment and consumables. The most efficient way to request a quote is to send us your requirements by email to info@avm-sfx.com.

Don't forget to mention the dates you need the equipment and the location for delivery and return.

If you can't wait to hear back from us, go to sfx.rentals to simulate a calculation of the costs for your next project or find the latest additions to our inventory.

Please make sure you request all cables, hoses, nozzles, and other accessories necessary for a safe yet spectacular show. When in doubt, reach out to us. We are here to help!

2. Confirming a quote
We will make you a complete quote, including transport costs if applicable. As soon as you sign the offer, the equipment is officially booked and reserved for you.

Please make sure you order well in advance of your required delivery date.

If you need to make modifications or if you want to cancel your order, always do so through email.

3. Delivery
Upon arrival, check the delivery for any damages. If you notice damage in any way, please inform the driver immediately to take notice.

Unload the equipment and check if your order is complete and nothing is missing. If anything seems incomplete or damaged, please inform us as soon as possible. Send us pictures or videos to determine if you can still use the equipment safely.

Please note that you are responsible for all goods and their condition once delivery has been made. As the goods are your responsibility while you have them, we seriously recommend you take adequate insurance against all potential risks involved.

All equipment and accessories remain the property of AVM-SFX at all times during rental contracts.

4. Return
Please empty all consumables and clean the machines after usage to avoid extra costs. The devices need to be returned in the same condition as you received them from us.

Accidents can happen. Should you have any damaged or broken equipment after usage, please mark them and let us know.

5. Inspection
Once the equipment returns to our warehouse, we will check it before sending it out again. Should we find damage or missing parts, we'll inform you immediately. We will also check to see if the equipment is clean and emptied. Repairs of damaged equipment, replacement of missing parts, and cleaning services will be invoiced.

ATTENTION!
In no way can AVM-SFX be held responsible for wrong usage, wrong placement, or any accidents whatsoever when using their equipment. The client is responsible for taking the necessary precautions when using the equipment and reading the user manual before usage.

All listed prices are non-binding end-user prices in EUR, VAT exclusive and ex-works Affligem, Belgium.

International Transport Service

Receiving all the equipment you need from just one place simultaneously is a huge benefit. For delivering your orders worldwide, we use general (groupage) forwarders.

AVM-SFX has all the necessary hardware and accessories for dry hire under one roof. As a result, hiring special effects or consumables has never been easier.

But it doesn't stop there! When you require equipment faster or have a last-minute inquiry, we can use our network of dedicated express couriers to get your gear as quickly as possible anywhere in the EU or the rest of the world.

Logistical distress is a thing of the past!

Ordering well in advance, helps us plan to get everything to you in time. As cross-border or international transport is not in our direct control, prices or transit times may change subject to the carriers pricing policy or schedules. But, of course, in emergency cases, we will do everything within our power to help you out.

You are also free to arrange your own transport or collect the equipment straight from our warehouse if that suits you better.

Take a look at the reference table to get an idea of the standard transit times for shipments from Belgium to the dedicated countries. Isn't your country listed? Reach out to us, and we'll get back to you as soon as possible.

Country	Transit time
Austria	9 - 10 days
Belgium	2 days
Croatia	5 - 8 days
Czech Republic	4 days
Finland	6 - 7 days
France	2 - 5 days
Germany	3 - 4 days
Greece	6 - 9 days
Holland	2 days
Italy	4 - 7 days
Luxemburg	2 days
Norway	6 - 9 days
Poland	4 - 5 days
Portugal	6 - 8 days
Romania	6 - 9 days
Slovakia	4 - 5 days
Spain	4 - 7 days
Sweden	6 - 8 days
Switzerland	5 - 6 days
UK	3 - 5 days

RENT A LITTLE LONGER

From our extensive experience and knowledge of what the concerns are when hiring equipment, we have worked on a solution that makes renting equipment interesting for everyone, even for longer productions.

You, as our client, need the best and sharpest prices for your special effects. Whether you rent for short one-off show periods or a long tour period, our solution is designed to make it very interesting for you to hire all your special effects equipment and accessories from AVM-SFX.

The catalogue shows a dry hire base rental price. From 1 to 3 days of rental the base price remains the same. From the fourth day a coefficient applies. Please see table.

Rental days	Coefficient rate
1 - 3 days	1
4 - 7 days	1,5
8 - 14 days	2
15 - 21 days	2,5
22 - 28 days	3

For longer than three days, take the base price and multiply it by the coefficient.
Calculating your rental period starts from the day the equipment is shipped from our warehouse until the day it arrives back in our warehouse.

For longer rental periods please contact us for an in-depth analysis of your request for which we will quote the best conditions and prices possible.
